11	70,650 - 211,950	211,951 - 247,275	247,276 - 282,600
12	76,150 - 228,450	228,451 - 266,525	266,526 - 304,600
For each additional person, add	\$5,500		

Catholic Health provides financial assistance to uninsured and underinsured patients based upon income levels.

The above income levels refer to family income. Family income includes earnings, unemployment compensation, workers' compensation, Social Security, supplemental security income, public assistance, veteran payments, survivor benefits, pension or retirement income, interest, dividends, rents, royalties, income from estates, trusts, educational assistance, alimony, child support, assistance from outside the household, and other miscellaneous sources. Non-cash benefits (such as food stamps and housing subsidies) do not count. Family income is calculated before taxes and excludes unrealized capital gains or losses.

Uninsured Patients – Patients without insurance coverage for their medical expenses. Uninsured patients may receive financial assistance for medically necessary services on a sliding scale of up to 100% of charges.

Underinsured Patients – Patients with health insurance but have spent more than ten percent (10%) of their gross income on out-of-pocket medical expenses in the past twelve months. Underinsured patients may receive financial assistance for medically necessary services of up to 80% discount of the amount that would have been paid pursuant to such patient's insurance cost sharing.
