

Dear Diocesan Colleague,

As an employee of the Diocese of Rockville Centre, you are eligible for discounted access to the exceptional physicians and clinical programs of Catholic Health. Proudly sponsored by the Diocese, our health care system has been dedicated to keeping Long Islanders healthy for over a century. Today, Catholic Health encompasses six hospitals, an expanding network of physician practices, home care services and numerous Catholic Health Ambulatory & Urgent Care centers conveniently located throughout Nassau and Suffolk counties. Chances are, you've driven past one or two.

Here's the best part—as a member of the Diocese, you can take advantage of discounts on Catholic Health services.

Even better, the quality of care you'll receive at Catholic Health is outstanding. Our team of close to 18,000 health care professionals—physicians, nurses, lab technicians, imaging specialists, and more—are all part of one of the nation's most highly recognized health care systems. And because we are Long Island's only faith-based health care system, our approach goes beyond just treatment—we infuse our care with a healthy dose of compassion. We see every patient as a human being, not a case number.

So if it's time for a check-up, or perhaps you're just looking for a new doctor, give us a call.

You can schedule an appointment with a Catholic Health provider near you by calling **a dedicated hotline just for Diocesan members and eligible dependents: (833) 274-7851.**

I also encourage you to visit our Catholic Health website or simply scan the QR code within the attached flyer to learn more about our breadth of services, as well as our many awards and recognitions. You'll see we provide the most innovative clinical care on Long Island. Our high level of clinical expertise is always coupled by a genuine respect for our patients' innate humanity. Put simply, no one cares for Long Islanders like we do.

Thank you for considering Catholic Health.

Patrick O'Shaughnessy, DO, MBA
President & Chief Executive Officer
