

Catholic Health Services of Long Island

At the heart of health

Cancer Institute

Serving Long Islanders

The Catholic Health Services (CHS) Cancer Institute is committed to providing the highest quality cancer care, close to home. CHS offers a full array of services across the system to address patients' needs—from preventive screening and diagnostics to state-of-the-art treatments—so that Long Islanders do not need to travel far for care. One of the system's initiatives is the Lung Cancer Screening Program. Available at all six CHS hospitals, it offers qualifying at-risk individuals low-dose CT scans to detect lung cancer in its earliest, most treatable stages.

Our Oncology Programs

CHS has programs accredited through the American College of Surgeons Commission on Cancer, in recognition of the high-caliber care delivered at those facilities. The Cancer Institute at St. Francis Hospital, located in East Hills, and West Islip's Good Samaritan Hospital Medical Center provide community-based, comprehensive cancer care. St. Francis's Institute also offers a satellite office and infusion center at St. Joseph Hospital in Bethpage. Good Samaritan's new cancer center, slated to open in 2019, will include expanded supportive services and high-quality, comprehensive care given in a modern, nearby setting. In addition, further program development is planned at other hospitals across the system.

A Full Spectrum of Cancer Services, Including:
